GLOBAL MEGATRENDS BOOST THE RAILROADS

Urbanization

Today, about 55 percent of people live in cities. By 2050, this share is expected to rise to 68 percent, which will lead to an increase in local transport volumes.

Globalization

International trade flows will continue to increase despite current developments. This requires efficient transport systems.

Population growth

The global population will grow to more than 11 billion by the end of the century. This will lead to a higher demand for transportation of people and goods.

Sustainability

Rail is the mass transport mode with the best CO₂ footprint and thus a key driver of green mobility.

Digitalization

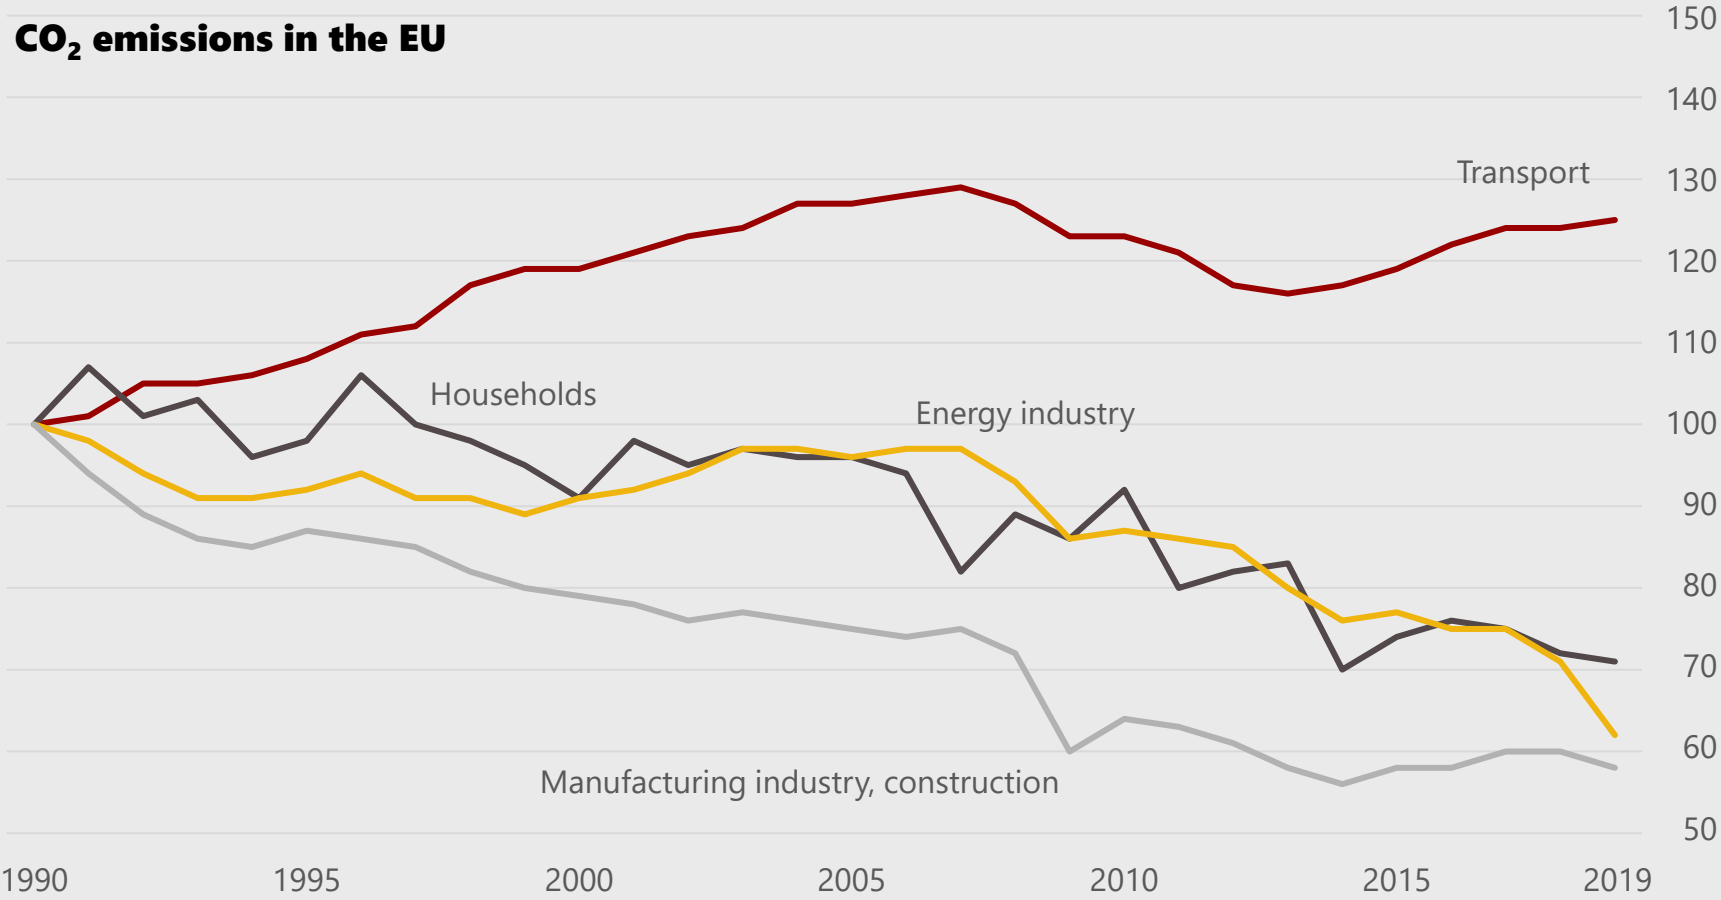

Digitalization including IoT, AI, Big Data & Data Analytics is a process of change for society, but will also lead to significant changes in the rail industry.

Sustained higher traffic volumes can best be served sustainably by the environmentally friendly mode of rail transport!

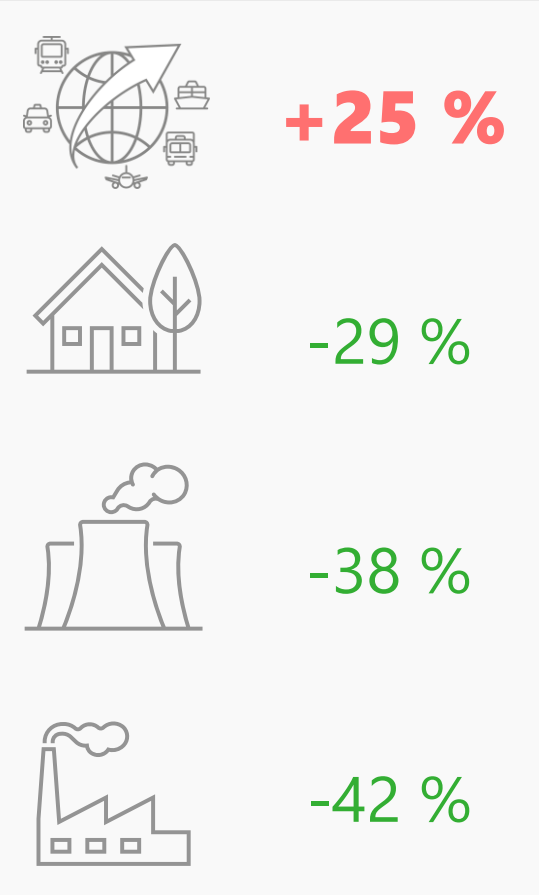

DECARBONIZATION IS THE KEY TO LIMITING GLOBAL WARMING

...BUT OVERALL, THERE IS STILL TOO LITTLE INVESTMENT IN RAIL INFRASTRUCTURE IN MANY COUNTRIES

NUMEROUS COUNTRIES HAVE RUN ON WEAR AND TEAR WITH THE RAILROADS

25 percent Share of transport sector of CO emissions_{2e}

~€600 billion to finance of the Green Deal

Targets by 2030:

Among other things, high-speed rail traffic to **double throughout Europe**

Targets by 2050:

Including a **90 percent** reduction in transport-related greenhouse gas emissions
High-speed rail traffic to **triple across Europe**
Rail freight transport to **double across Europe**
